# Caffeine

## Caffeine

Even a teaspoon of the powder could be lethal, it's often equivalent to 25 cups of coffee.

# Powdered Alcohol

# Balling

# Salt and Ice Challenge

# Shatter

# “Big Hit”

- For the ultimate high, ... a “**rig**” ... a glass water pipe similar to a bong with a titanium or glass “nail” where the bowl would be. A blow torch or electric heating element is then used to heat the nail to the optimal temperature (575 – 625°F) and when the concentrate is touched to the nail, it is vaporized instantly and inhaled by the user through the mouth piece. An oil rig is the most common method for vaporizing shatter.
- **Dabbing**, the act of smoking concentrates, is not for the faint of heart. The high from a dab can be like getting high for the first time, even for the more experienced smokers.
